Logosol M7 is the ultimate portable saw mill, based on 20 years of experience. Over 20 000 Logosol saw mills have already been sold around the world!

Dovetail Jig

For fast and precise log house production!

Big Mill Timberjig

Turn your chain saw into a lightweight portable saw mill!

LOGOSOL SAW MILLS

Since our first saw mill appeared on the market in 1988, its construction and design have greatly improved. This has resulted in the perfect one-man saw mill. Over 20 000 Logosol Saw mills have already been sold around the world. Hundreds of thousands of people profit from locally produced lumber, made by our saw mill. At the same time, the sale of spare parts is insignificant, and that says quite a lot.

With the Logosol Saw mill you can mill a tree on-site out in the woods, in the lengths and dimensions of your choice. Because it is lightweight and easy to use, one person can easily move it, set it up, and mill lumber with it.

Logosol M7 saw mill

One of the main advantages of the M7 is its mobility. You can single-handed transport it to a forest or to your cottage. Once you've done that, all that is left for you to do is to fell a tree and subsequently process it into boards, laths and beams. Cuts logs up to 16 ft long, and can be extended.

Logosol provides our customers with the highest personal service.

Experience

We have 20-year experience in design and working hands on with Logosol equipment.

PLANER/ MOULDER

Our revolutionary planer/moulders cut trim, mouldings, and tongue & groove flooring. This additional processing increases the value of the lumber fourfold. This gives you the opportunity both to sell finished strips, trims, panels, skirting boards and to realize new projects.

Logosol planer/moulders have a large range of knives for every purpose - and we can easily produce custom cutter knives to make just that profile you need. Our catalog of moulding knives includes tongue and groove, baseboard, and crown moulding cutters.

Logosol DH410

NEW

2-sided planer/moulder DH410

\$CAD 5,495.00 1-Phase/208-220 v

(Feeding speed: Standard 6 m/min)

The 2-sided planer/moulder planes boards up to 410 mm (16") wide and 260 mm (10") thick. The side cutter can handle up to 100 mm thick boards. You can produce practically everything from thin laths to beams for log frame structures. To accomplish four-sided profiling or planing, you just run the board twice through the machine.

DH410 planes up to a width of 410 mm (16")

Logosol PH260

FOR FREE

Buy your PH260 now and you get:

- * Two Feeding Tables For the Price of One!
 - * Wood Moisture meter for free

Extractor Kit PH260

3-phase **\$CAD 1,950.00**

1-phase **\$CAD 1,995.00**

FOR FREE

Buy your Extractor now, and you get 12 m Exhaust Hose with clamps for free!
Value: \$CAD 225.00

It's crucial to get the wood chips and dust out of the 4-sided planer. This requires a well designed performing blower. Logosol designed their own blower to ensure just this.

The heart of the system is a sturdily built extractor unit. The casing and impeller are manufactured in steel giving a flow rate of 4000 m³/h (2400 CFM) to match the requirements of the PH260. The suction inlet is 4 x 100 mm (4"). The outlet size is 200 mm (8"). Motor 3 kW (4 Hp), 220 V.

Log Turner \$CAD 135.00

Unique double cant hook from Logosol. The perfect tool for turning logs safely on your saw mill.

Buy your Logosol saw mill now, and get a Log Turner and a Wood Moisture meter for free!

Wood Moisture meter \$CAD 85.00

Measure the humidity in your timber before planing, painting or building.

Start-Up Kit Sawmill \$CAD 225.00

4 chains for 40 cm (16") guide bar, 1 filing vice, 1 file holder, 6 round files, 1 Swedish craftsman knife

Taxes and shipping not included. Prices and offers may change without further notice or while stocks last.
